

The Appeal of ElectroHyperSensitive People to all elected officials and doctors in Europe

EHS IS A HUMANITARIAN EMERGENCY

Electrohypersensitivity (EHS) is a disabling environmental syndrome that can occur suddenly or develop gradually, following exposure to artificial electromagnetic fields (EMF). Wireless radiation: mobile phones, cordless phones, wifi, bluetooth, smart meters, any wireless object or device, and electrical pollution are among the main sources of electromagnetic pollution.

We, electrohypersensitive people (EHS), are sounding the alarm.

The distress of people with EHS disabilities⁽¹⁾, who are increasingly numerous, is a humanitarian emergency. EMF pollution devastates their existence, depriving them of access to housing, health care, work and causing them to suffer family and social exclusion, hopeless precariousness and suffering leading some to suicide.

We demand without delay:

- In the name of the obligation to assist persons in danger⁽²⁾: **immediate shelter in areas not exposed to artificial radiation, known as “white zones”, in every region, for the most affected EHS people.**
- In the name of the precautionary principle⁽³⁾: **a freeze on the siting of new transmitters and a halt to the reinforcement of existing transmitters, with a moratorium on the European decision on the siting of mobile phone masts (European Gigabit Infrastructure Act)⁽⁴⁾ and the right to smart meters withdrawal.**
- In the name of the fundamental right to housing⁽⁵⁾: **the safeguard of radiation-free areas (white zones) where EHS sufferers have found refuge, which must be a priority.**
- In the name of States obligations in regard to disability⁽⁶⁾: **the implementation of accessibility programs to restore the social inclusion of EHS people (healthcare facilities, public transport, public services, education, sport, culture and leisure, etc.).**

A complete reform of European regulations on exposure to electromagnetic waves, taking into account the recognition of the biological effects⁽⁷⁾ of artificial EMFs, is now required. :

- The devastating effects of artificial EMFs on humans and all living organisms have been documented for over 40 years, and we now have a corpus of thousands of undeniable scientific studies⁽⁸⁾.
- The conflicts of interest of the International Commission on Non-Ionizing Radiation Protection (ICNIRP), a private entity which in 2002 dictated the standards without any founded scientific justification, from which the standards are still drawn up today⁽⁹⁾, have been clearly denounced in the European Parliament⁽¹⁰⁾.
- No elected representative or doctor in Europe should ignore the numerous scientific publications, recent and long-standing, demonstrating that synthetic EMFs affect living organisms: humans⁽¹¹⁾, animals⁽¹²⁾ and plants⁽¹³⁾.
- The epidemic of chronic diseases is evidence of the unfolding health crisis. Artificial EMFs are toxic for environmental ecosystems⁽¹⁴⁾, in addition to pesticides, endocrine disruptors and fine particles⁽¹⁵⁾. Continuous exposure of everyone, everywhere, at ever-increasing levels, increases the risk of cancer⁽¹⁶⁾, infertility⁽¹⁷⁾, genetic damage⁽¹⁸⁾, damage to the central nervous system⁽¹⁹⁾, immunodepression⁽²⁰⁾, learning disabilities⁽²¹⁾, behavioural disorders⁽²²⁾, chronic fatigue, sleep disorders, electrohypersensitivity⁽²³⁾, multiple chemical sensitivity (MCS)⁽²⁴⁾, oxidative stress⁽²⁵⁾ and inflammation⁽²⁶⁾.

Having this appeal and its attached bibliography in hand, no one may any longer pretend they didn't know. The EMP VICTIMS collective is asking you to take vital decisions that are a necessity for everyone in terms of public health and environment.

BIBLIOGRAPHIE

The primary objective of this bibliography is to show the commitment of scientists and the work of European officials on the topic of EMFs and the many sanitary issues involved. We won't be satisfied with simplistic work by the authorities, and remain at your disposal to provide answers to any questions you may have.
